

Indiana at a Crossroads: Expected Results of Tracking vs. Re-scheduling PSE

- Mississippi saw a **68% drop** in labs in the first 6 months after returning PSE to a prescription drug. Oregon saw a **72% decrease** in labs in the first 6 months after returning PSE to a prescription drug. Oregon saw an additional **40% reduction** in the next 6 months.
- Kentucky has seen a **248% increase** in lab seizures in 2 ½ years since implementing MethCheck/NPLEx.
